

Special Electric Vehicle Pricing

for Stakeholders of CLEAN CITIES GEORGIA

**Extended to
March 31, 2017**

Nissan North America is pleased to announce the extension of a special rebate for CLEAN CITIES **GEORGIA** Stakeholders on the 100% Electric, Nissan LEAF. Nissan continues to support the CLEAN CITIES commitment to advance the energy, economic, and environmental security of the United States through reduced dependence on foreign oil for transportation.

- ✓ Over 100 Miles of Range on a Single Charge, w/30 kWh
- ✓ Low Operating Costs, Spirited Performance, and Superior Reliability
- ✓ DC Fast Charge, 80% in 30 minutes
- ✓ Built in America, Smyrna Tennessee

CLEAN CITIES **GEORGIA** Stakeholders can use the organizations fleet incentive from Nissan, to purchase a Nissan LEAF, "America's Best Selling Electric Vehicle", at a substantial discount. Currently the retail incentive is \$4,000, but under this program, **Stakeholders are eligible for a \$10,000 rebate.** That's 2 ½ times the rebate available to retail customers. Combined with the Federal EV Tax Credit of \$7,500, Stakeholders enjoy **net savings up to \$17,500.**

Both CLEAN CITIES **GEORGIA** and Nissan are committed to environmental sustainability and reducing greenhouse gases. Key to this goal is limiting output from commuting and fleet operations. Zero emissions vehicles, like the 100% electric Nissan LEAF, can play an important role. Already proven perfect for urban commuting, with low operating costs and superior reliability, an EV may well fit your lifestyle.

This special offer is available to CLEAN CITIES **GEORGIA** Stakeholders, and cannot be combined with any other Nissan fleet or retail offers. Program concludes March 31, 2017.

Clean Cities Fleetail

Federal EV Tax Credit

Net Savings

\$10,000 + \$7,500 = \$17,500

CLEAN CITIES **GEORGIA** is the central coordinating point for alternative fuel vehicle activities in the state of Georgia. Out of nearly 100 Clean Cities Coalitions across the country, CLEAN CITIES **GEORGIA** has the distinction of being the first. Officially designated by the Dept. of Energy in 1993. CCGA partners with federal, state, and local agencies, utilities, public interest groups, and public and private fleets, focused on deployment of Alternative Fuel Vehicles, Idle Reduction, and Fuel Economy Measures.
